Call - Sprinter Open End DAX®

PRODUCT DESCRIPTION

Sprinter Open End products are leveraged products without a fixed maturity, but are characterised like standard Sprinter warrants by their direct worthless expiry when reaching or falling below (call) or reaching or exceeding (put) the particular knock-out level. Due to the low amount of capital employed in comparison to a direct investment in the underlying, they allow the leveraged product an overproportional participation in the price performance of the underlying and can therefore be used for speculation or hedging positions. The strike price and knock-out level are adjusted daily. The following applies as a rule: The closer the actual market price of the underlying is to the strike price, the greater is the leveraging effect. In contrast to standard warrants, the price of the Sprinter Open End is only marginally affected by volatility.

In Switzerland, these financial instruments are considered structured products. They are not collective investment schemes within the meaning of the Swiss Federal Act on Collective Investment Schemes (CISA), and are therefore not subject to the regulations of the CISA or the supervision of the Swiss Financial Market Supervisory Authority FINMA.

| Minimum investment | 1 Sprinter Open End |
| Minimum exercise volume | 1 Sprinter Open End or multiples thereof |
| Minimum trading lot | 1 Sprinter Open End |
Exercise rights of the holder
The owner is entitled to exercise his Sprinter Open Ends from the first exercise day based on applicable conditions and barring the occurrence of a knock-out event on this day and on any following trading day, or to demand payment of a corresponding redemption amount. The corresponding declaration of the exercise must arrive at the trading office by 11.00 am (Swiss time).
Bank Vontobel AG, Zürich, attn. Corporate Actions, Gotthardstrasse 43, 8022 Zürich, Phone, +41 (0)58 283 74 69, Fax +41 (0)58 283 51 60.

Issuer's call right
The issuer is entitled to terminate unexercised Sprinter Open End certificates on any trading day, but no sooner than three months after provisional admission to trading on the SIX Swiss Exchange.

Knock-Out event
A Knock-Out event occurs when the price of the respective underlying value reaches or breaches the current Knock-Out Level at any time during trading hours of the underlying on the reference stock exchange or index composition advisor (continuous monitoring). In this event, the Sprinter Open End expires immediately worthless.

Valuation date
The valuation date is the date on which the Sprinters Open End: (a) are exercised by the holder in accordance with the terms and conditions governing Sprinters Open End, or (b) are terminated by the issuer, whereas a Knock-Out event occurs, prior to which the holder of the Sprinters Open End exercises his right or the issuer terminates.

Redemption amount upon exercise or termination
For each Call-Sprinter Open End exercised or terminated, the following amount is paid back to the investor in the reference currency:
\[ \text{max}(0; \text{final fixing price} - \text{current strike}) \times \text{ratio} \times \text{FX} \]
whereby FX is the current Interbank conversion rate of the trading currency of the underlying into the reference currency.
The redemption amount is paid out five trading days after the valuation date. The redemption amount is rounded off to two decimal points.

Final fixing price
The final fixing price is – in the case of a) an exercise by the holder of the Sprinter Open End b) a termination by the issuer – the relevant valuation price on the valuation date.

Relevant valuation price
The Closing price determined by the place of determination

Trading day
A trading day for the Sprinters Open End is a day on which the Sprinters Open End are traded on the SIX Swiss Exchange.

Current Strike
At the end of an adjustment day, the Paying and Calculation Agent adjusts the current Strike of the Call-Sprinter Open End using the following formula:
\[ \text{FL}(n) = \text{FL}(a) + \frac{(r + \text{FS}) \times \text{FL}(a) \times n}{360} - \text{divf} \times \text{div} \]
whereby:
\( \text{FL}(n) \): Strike following adjustment = current strike.
\( \text{FL}(a) \): Strike before adjustment.
\( r \): Interest rate (LIBOR resp. EURIBOR); Interest rate for Money Market deposit overnight which is determined by the paying and calculation agent in the trading currency of the underlying.
\( \text{FS} \): Current financing spread.
\( n \): Number of calendar days between the current adjustment date (exclusive) and the next adjustment date (inclusive).
\( \text{divf} \): Taxation factor for a possible dividend payment. The taxation factor is between zero and one, and is established by the calculation agent at its own discretion.
\( \text{div} \): Dividends (or other payments) since last adjustment day.
The result of the calculation is rounded up (in case of call) or rounded off (in case of put) off to the next multiple derived from the rounding off of the strike.

Current Knock-Out-Level
Corresponds to the current strike

Adjustment day
Each trading day for Sprinter Open End

Current financing spread
The current financing spread is fixed by the Paying and Calculation Agent at its own discretion within a range of between zero and the maximum financing spread on each adjustment day.

Clearing / Settlement
SIX SIS AG

Listing
Will be applied for on the SIX Swiss Exchange

Secondary market
Secondary market trading is ensured over the entire term.
Fiscal treatment in Switzerland

Gains from this product are not subject to direct federal taxes. Neither withholding tax nor the stamp duty at issuance is imposed. Secondary market transactions are not subject to the Swiss securities transfer tax. If delivery of the underlying is stipulated, the securities transfer tax may, however, be imposed.

For Swiss paying agents this product is not subject to the EU tax on interest.

The taxation mentioned is a non-binding and non-exhaustive summary of the applicable treatment of Swiss-domiciled private investors for tax purposes.

The investor’s specific circumstances, however, are not taken into account. We point out that Swiss and/or foreign tax law or the authoritative practice of Swiss and/or foreign tax authorities can change at any time or specify further tax or charge liabilities (possibly even with retrospective effect). The levying and transferring of further taxes and charges, such as (foreign) transaction taxes, taxes at source and/or withholding taxes, to the investor remains expressly reserved (see also the corresponding tax law explanations in the issuance programme).

Potential investors should have the tax effects of the purchase, holding, sale or repayment of this product examined by their own tax adviser - especially with respect to the effects of taxation under another jurisdiction.

Title

The Structured Products are issued in the form of non-certificated book-entry securities of the issuer.

No certificates, no printing of bonds.

Applicable law/place of jurisdiction

Swiss Law/Zurich 1, Switzerland

Prudential supervision

As a bank and prudentially supervised financial intermediary, Bank Vontobel AG is subject to the supervision of individual banks, while Vontobel Holding AG and Vontobel Financial Products Ltd. as group member companies are subject to complementary, consolidated group supervision by the Federal Financial Markets Regulator FINMA. Vontobel Financial Products Ltd. is registered in the register of the Dubai International Finance Centre as a non-regulated company. Neither Vontobel Financial Products Ltd. nor Vontobel Holding AG are financial intermediaries subject to prudential supervision within the meaning of art. 5 para.1 subpara. a ciph. 1.-4. of the CISA.

Description of the underlying DAX®

The DAX® reflects the segment of blue chips and measures the performance of the 30 largest German companies in terms of order book volume and market capitalization of the Prime Standard at the FWB® Frankfurter Wertpapierbörse (Frankfurt Stock Exchange).

PROSPECTS OF PROFIT AND LOSSES

Sprinter Open Ends offer the opportunity to benefit on the basis of the leveraging of a positive price performance (Call-Sprinter Open End) or a negative price performance (Put-Sprinter Open End) of the underlying. The potential for profit is thus basically unlimited for Call-Sprinter Open Ends; for Put-Sprinter Open Ends, the maximum potential for profit is limited and reached when the market price of the underlying drops to zero. Based on the leveraging effect, changes in the value of the underlying can overproportionally affect the value of Sprinter Open Ends. Any possible profit consists of the positive difference between the sales price that is achieved or the repayment amount and the issuing or purchase price that is paid. The redemption amount receivable in the event of any exercise of the warrant depends on the figure by which the market price of the underlying exceeds (Call-Sprinter Open End) or falls below (Put-Sprinter Open End) the actual strike price on the exercise day. Sprinter Open Ends do not provide any current income. As a rule, they lose value if for Call-Sprinter Open Ends the underlying’s price does not rise or if for Put-Sprinter Open Ends there is no fall in the underlying’s price. Sprinter Open Ends have no set maturity, but they become immediately worthless when the knock-out level is reached. The actual knock-out level is identical with the actual strike price. The strike price is adjusted daily to the market and depends amongst others on the previous strike price and the financing spread. In this regard the financing spread matches the financing costs of the issuer through the interest on deposits. The risk for an investment in Sprinter Open Ends is based not only on the leverage effect, but also on the danger of a knock-out event occurring, which is significantly greater than it would be for a direct investment. On the basis of the daily market adjustment of the strike price, a knock-out event may also occur with a previously unchanged market price of the underlying, and thus resulting in an expiration without any value.
SIGNIFICANT RISKS FOR INVESTORS

Currency risks
If the underlying or underlyings is/are denominated in a currency other than the product's reference currency, investors should bear in mind that this may involve risks due to fluctuating exchange rates and that the risk of loss does not only depend on the performance of the underlyings but also on any unfavourable performance of the other currency or currencies. This does not apply for currency-hedged products (quanto structure).

Market risks
The general market performance of securities is dependent, in particular, on the development of the capital markets which, for their part, are influenced by the general global economic situation as well as by the economic and political framework conditions in the respective countries (so-called market risk). Changes to market conditions such as interest rates, commodity prices or corresponding volatilities may have a negative effect on the valuation of the underlyings or the structured product. There is also the risk of market disruptions (such as trading or stock market interruptions or discontinuation of trading) or other unforeseeable occurrences concerning the respective underlyings and/or their stock exchanges or markets taking place during the term or upon maturity of the structured products. Such occurrences can have an effect on the time of redemption and/or on the value of the structured products.

Secondary market risks
Under normal market conditions, the issuer or the lead manager intend to post bid- and ask-prices on a regular basis. However, neither the issuer nor the lead manager is under any obligation with respect to investors to provide such bid- and ask-prices for specific order or securities volumes, and there is no guarantee of a specific liquidity or of a specific spread (i.e. the difference between bid- and ask-prices), for which reason investors cannot rely on being able to purchase or sell the structured products on a specific date or at a specific price.

Issuer risk
The value of structured products may depend not only on the performance of the underlyings, but also on the creditworthiness of the issuer/guarantor, which may change during the term of the structured product. The investor is exposed to the risk of default of the issuer/guarantor. For further information on the rating of Vontobel Holding AG or Bank Vontobel AG, please see the issuance programme.

Publication of notifications and adjustments
All notifications to investors concerning the products and adjustments to the product terms (e.g. due to corporate actions) are published under the "Product history" of the respective product www.derinet.ch, and, in the case of products listed on the SIX Swiss Exchange in accordance with the valid provisions at www.six-swiss-exchange.com.

Classification
In Switzerland, these financial instruments are considered structured products. They are not collective investment schemes within the meaning of the Swiss Federal Act on Collective Investment Schemes (CISA), and are therefore not subject to the regulations of the CISA or the supervision of the Swiss Financial Market Supervisory Authority FINMA.

Restrictions on sales
U.S.A., U.S. persons, UK, EEA

Further risk information
Please also note the additional risk factors and selling restrictions set out in detail in the issuance programme.
LEGAL NOTICE

Product documentation
Only the Termsheets published at www.derinet.ch along with the associated notices and adjustments shall be legally valid. The original version of the Termsheet is in German; foreign-language versions constitute non-binding translations. The issuer and/or Bank Vontobel AG is entitled to correct spelling mistakes, calculation or other obvious errors in this Termsheet and to make editorial changes, as well as to amend or supplement contradictory or incomplete provisions, without the consent of the investors.

Up until the fixing date, the product terms designated as such of the “Termsheet (Indication)” are indicative and may be adjusted. The issuer is under no obligation to issue the product. The “Termsheet (Final Terms)”, which is usually issued on the date of the initial fixing, contains a summary of the most important final terms and information, and constitutes the “Final Terms” pursuant to art. 21 of the Additional Rules for the Listing of Derivatives of SIX Swiss Exchange. Together with the issuance programme of June 1, 2012, registered with SIX Swiss Exchange (the “Issuance Programme”), the Final Terms constitute the complete listing prospectus according to the the Listing Rules. In the event of discrepancies between this Termsheet and the Issuance Programme, the provisions of the Final Terms shall take precedence.

For structured products not listed on the SIX Swiss Exchange, the Termsheet (Indication) constitutes the preliminary simplified prospectus and the Termsheet (Final Terms) constitutes the definitive simplified prospectus pursuant to art. 5 of the Federal Act on Collective Investment Schemes (CISA). In addition, reference is also made (with the exception of the provisions authoritative for a listing) to the Issuance Programme, in particular to the detailed information on risks contained therein, to the General Terms and Conditions and to the descriptions of the corresponding product types.

Material changes since the most recent annual financial statements
Subject to the information in this Termsheet and the Issuance Programme, no material changes have occurred in the assets and liabilities, financial position and profits and losses of the issuer/guarantor since the reporting date or the close of the last financial year or the interim financial statements of the issuer and, as the case may be, of the guarantor.

Responsibility for the listing prospectus
Bank Vontobel AG takes responsibility for the content of the listing prospectus and hereby declares that, to the best of its knowledge, the information is correct and that no material facts or circumstances have been omitted.
