The Complex Products allow the holders to benefit from an unlimited participation in a percentage of any positive performance of the Underlying. The potential return on the Complex Products is not capped. Holders participate above average in such positive performance due to the Participation.

If the value of the Underlying has developed negatively at maturity, the Payout Amount will be equal to zero and the holders will only receive the Final Redemption Amount, which is equal to the Protected Redemption Amount, on the Final Redemption Date.

Indicative trading prices may be obtained on Reuters CSZEO00 and Bloomberg CSZE.

**Minimum Trading Lot / Subscription Amount**

USD 1’000

Clearing

SIX SIS Ltd, Euroclear S.A., Clearstream Banking

---

(1) Herein called the “Complex Products”.

(2) Investing in the Complex Products requires specific knowledge on the part of the potential investor regarding the Complex Products and the risks associated therewith. It is recommended that the potential investor obtains adequate information regarding the risks associated with the Complex Products before making an investment decision.

(3) See Swiss Derivatives Map at www.sspa-association.ch.
Indicative Payout

Payout Amount  

A cash amount equal to the Denomination multiplied by the greater of (x) zero (0) and (y) the product of (i) the Participation and (ii) the ratio of (A) the difference between the Final Level and the Strike, divided by (B) the Initial Level, calculated by the Calculation Agent in accordance with the following formula:

\[
\min(0, \frac{\text{Final Level} - \text{Strike}}{\text{Initial Level}})
\]

Participation 125%

Payout Date the Final Redemption Date, being the date on which the Payout Amount per Complex Product will be paid, unless previously redeemed, repurchased or cancelled.

Initial Level 100% of the Fund Interest Price on the Initial Fixing Date.

Strike 100% of the Initial Level.

Final Level the average of the Fund Interest Prices on each fund business day during the Final Fixing Period, as determined by the Calculation Agent.

Fund Interest Price on any scheduled trading day, the net asset value per fund interest, as calculated and published by, or on behalf of, the management company on such day.

Indicative Redemption

Final Redemption Amount 100% of the Denomination (i.e., the Protected Redemption Amount).

Protected Redemption Amount 100% of the Denomination.

Indicative Distribution Fee

Distribution Fee up to 0.75% p.a. (in percent of the Denomination and included in the Issue Price)

Swiss Taxation (Indicative)

The following statements and discussions of certain Swiss tax considerations relevant to the purchase, ownership and disposition of the Complex Products are of a general nature only and do not address all potential tax consequences of an investment in the Complex Product under Swiss law. This summary is based on treaties, laws, regulations, rulings and decisions currently in effect, all of which are subject to change. It does not address the tax consequences of the Complex Products in any jurisdiction other than Switzerland.

Tax treatment depends on the individual tax situation of each investor and may be subject to change.

Potential investors will, therefore, need to consult their own tax advisors to determine the special tax consequences of the purchase, ownership and sale or other disposition of a Complex Product. In particular, the precise tax treatment of a holder of a Complex Product needs to be determined with reference to the applicable law and practice at the relevant time.

The investors shall be liable for all current and future taxes and duties as a consequence of an investment in Complex Products. The income tax treatment as depicted below is applicable to individual persons with tax residence in Switzerland and private assets. Withholding tax and stamp taxes are applicable to all investors; however, specific rules apply with respect to certain types of investors and transactions.

No Swiss withholding tax (Verrechnungssteuer).

Secondary market transactions are subject to securities transfer stamp tax (0.15%) for Swiss resident investors. [TK-Code 22]

The difference between (i) the selling price (converted into Swiss francs at daily exchange rate) or the final redemption amount (converted into Swiss francs at daily exchange rate) and (ii) the purchase price (converted into Swiss francs at daily exchange rate) is subject to income tax for Swiss resident private investors upon selling or redemption (reine Differenzbesteuerung). In addition, any payouts are subject to income tax for Swiss resident private investors.

Withholding Tax

Investors in this Complex Product should note that payments under this Complex Product may be subject to withholding taxes (including, but not limited to, United States withholding taxes imposed pursuant to FATCA (as defined in the Base Prospectus) or Section 871(m) of the US Internal Revenue Code of 1986, as amended). Any payments due under this Complex Product shall be paid net of such tax. Please refer to the Terms and Conditions and the Base Prospectus for further detail. In the event that any withholding taxes are applicable to any amount payable under this Complex Product, the Issuer shall not be obligated to pay additional amounts in connection with any amounts so withheld.

The Issuer expressly disclaims all liability in respect of any tax implications.

II. Profit and Loss Prospects

Profit Prospects

The Complex Products allow the holders to benefit from an unlimited participation in a percentage of any positive performance of the Underlying. The potential return on the Complex Products is not capped. Holders participate above average in such positive performance due to the Participation.

Loss Prospects

If the value of the Underlying has developed negatively at maturity, the Payout Amount will be equal to zero and the holders will only receive the Final Redemption Amount, which is equal to the Protected Redemption Amount, on the Final Redemption Date.
Calculation Examples of the Redemption

<table>
<thead>
<tr>
<th>Performance of the Underlying at maturity:</th>
<th>Redemption per Complex Product:</th>
</tr>
</thead>
<tbody>
<tr>
<td>+ 30%</td>
<td>100% of the Denomination, plus a Payout Amount of USD 375.00.</td>
</tr>
<tr>
<td>- 10%</td>
<td>100% of the Denomination, no Payout Amount.</td>

<tr>
<td>- 30%</td>
<td>100% of the Denomination, no Payout Amount.</td>
</tr>
</tbody>
</table>

This table shows exemplary redemption scenarios regarding the Redemption as per the Final Redemption Date for illustrative purposes only and does not constitute a price indication for the Complex Products or the Underlying. During the term of the Complex Products, additional risks and other factors may influence the market value of the Complex Products. As a consequence, the pricing in the secondary market may differ significantly from the above table.

III. Important Risks for Investors

Important Risks

Issuer Risk

Investors bear the Issuer risk. The Complex Products' retention of value is dependent not only on the development of the value of the Underlying(s), but also on the creditworthiness of Credit Suisse AG, which may change over the term of the Complex Products. Furthermore, the Issuer's ability to fulfill its obligations under the Complex Products may be affected by certain other factors, including liquidity risks, market risks, credit risks, cross-border and foreign exchange risks, operational risks, legal and regulatory risks and competition risks.

The Complex Products are direct, unconditional, unsecured and unsubordinated obligations of Credit Suisse AG and are not covered by any compensation or insurance scheme (such as a bank deposit protection scheme). If Credit Suisse AG were to become insolvent, claims of investors in Complex Products would rank equally in right of payment with all other unsecured and unsubordinated obligations of Credit Suisse AG, except such obligations given priority by law. In such a case, investors in Complex Products may suffer a loss of all or a portion of their investment therein, irrespective of any favourable development of the other value determining factors, such as the performance of the Underlying(s).

Credit Suisse AG is licensed as a bank pursuant to the Swiss Federal Act on Banks and Saving Banks and as a security dealer pursuant to the Swiss Federal Act on Stock Exchanges and Securities Trading and is subject to supervision by the FINMA. Credit Suisse AG London Branch is authorised and regulated by FINMA in Switzerland, authorised by the Prudential Regulation Authority, is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of its regulation by the Prudential Regulation Authority are available from the Issuer on request.

Product Risk

Complex Products involve substantial risks and potential investors must have the knowledge and experience necessary to enable them to evaluate the risks and merits of an investment in Complex Products. Prospective investors should:

- ensure that they understand the nature of the risks posed by, and the extent of their exposure under, the Complex Products;
- make all pertinent inquiries they deem necessary without relying on the Issuer or any of its affiliates or officers or employees;
- consider the suitability of the Complex Products as an investment in light of their own circumstances, investment objectives, tax position and financial condition;
- consider carefully all the information set forth in the legally binding Terms and Conditions as well as all other sections of the Prospectus (including any documents incorporated by reference therein);
- consult their own legal, tax, accounting, financial and other professional advisors to assist them determining the suitability of Complex Products for them as an investment.

Risk of Total Loss

Although the Complex Products provide for full capital protection, investors may lose some or all of their investment therein. Accordingly (but subject to the immediately succeeding sentence), an investor's risk of loss is limited to the difference between the Issue Price (or, if different, the price such investor paid for the relevant Complex Product) and the Protected Redemption Amount. Nevertheless, investors in the Complex Products may lose some or all of their investment therein (including the Protected Redemption Amount), in particular if Credit Suisse AG were to become insolvent or otherwise unable to fulfill all or part of its obligations under the Complex Products. In addition, if an investor acquires a Complex Product at a price that is higher than the Protected Redemption Amount, such investor should be aware that the Protected Redemption Amount does not fluctuate with the purchase price paid for the Complex Product. Furthermore, even though the Complex Products provide for a Protected Redemption Amount, this does not mean that the market value of a Complex Product will ever be, or that an investor in a Complex Product will ever be able to sell a Complex Product for an amount, equal to or above the Protected Redemption Amount. Investors should be aware that the Protected Redemption Amount is only payable by the Issuer on the Final Redemption Date. If the Complex Products are early redeemed or if an additional adjustment event occurs, investors may receive a redemption amount that is considerably lower than the Protected Redemption Amount that would have otherwise been received.

Complex Products are unsecured obligations

Complex Products are direct, unconditional, unsecured and unsubordinated obligations of Credit Suisse AG and are not covered by any compensation or insurance scheme (such as a bank deposit protection scheme). If Credit Suisse AG were to become insolvent, claims of investors in Complex Products would rank equally in right of payment with all other unsecured and unsubordinated obligations of Credit Suisse AG, except such obligations given priority by law. In such a case, investors in Complex Products may suffer a loss of all or a portion of their investment therein, irrespective of any favourable development of the other value determining factors, such as the performance of the Underlying.

Unpredictable Market Value of the Complex Products

The market value of, and expected return on, Complex Products may be influenced by a number of factors, some or all of which may be unpredictable (and which may offset or magnify each other), such as (i) supply and demand for Complex Products, (ii) the value and volatility of the Underlying, (iii) economic, financial, political and regulatory or judicial events that affect Credit Suisse AG, the Underlying or financial markets generally, (iv) interest and yield rates in the market generally, (v) the time remaining until the Final Redemption Date, (vi) the difference between the level of the Underlying and the relevant threshold, (vii) Credit Suisse AG’s creditworthiness and (viii) dividend payments on the Underlying, if any.

Trading Market for Complex Products

The trading market for Complex Products may be limited, or may never develop at all, which may adversely impact the market value of such Complex Products or the ability of a holder thereof to sell such Complex Products.

Exposure to the Performance of the Underlying

Complex Products represent an investment linked to the performance of the Underlying and potential investors should note that any amount payable, or other benefit to be received, under Complex Products will depend upon the performance of the Underlying. Potential investors in Complex Products should be familiar with the behaviour of the Underlying and thoroughly understand how the performance of the Underlying may affect payments (or any other benefit to be received)
under, or the market value of, Complex Products. The past performance of the Underlying is not indicative of future performance. The market value of a Complex Product may be adversely affected by postponement or alternative provisions for the valuation of the level of the Underlying. There are significant risks in purchasing Complex Products that are linked to an emerging market Underlying.

Exchange Rate Risks
The settlement currency may not be the currency of the home jurisdiction of the investor in the Complex Products. Therefore, fluctuations in exchange rates may adversely affect the market value of a Complex Product or the value of the Underlying.

Broad Discretionary Authority of the Calculation Agent
The Calculation Agent has broad discretionary authority to make various determinations and adjustments under Complex Products, any of which may have an adverse effect on the market value thereof or amounts payable or other benefits to be received thereunder. Any such discretion exercised by, or any calculation made by, the Calculation Agent (in the absence of manifest error) shall be binding on the Issuer and all holders of the Complex Products.

Further Product Specific Risks

Upon redemption, investors in the Complex Products will receive the Protected Redemption Amount and the Payout Amount, the amount of which is dependent upon the performance of the Underlying.

In the Complex Products, the Issuer and/or its affiliates may pay to third parties remunerations (including fees and costs) that may be factored into the terms of this Complex Product. The Issuer and/or its affiliates may also offer such remunerations to third parties in the form of a discount on the price of the product. Receipt or potential receipt of such remunerations may lead to a conflict of interest in that the Issuer and/or its affiliates may realize a gain from the remunerations in excess of the costs associated with the remunerations. These costs are likely to adversely affect the market value of the Complex Products.

Exchange Rate Risks
The settlement currency may not be the currency of the home jurisdiction of the investor in the Complex Products. Therefore, fluctuations in exchange rates may adversely affect the market value of a Complex Product or the value of the Underlying.

Important Notices
By investing in the Complex Products, an investor acknowledges having read and understood the following terms:

Any information regarding the Underlying(s) contained in this document consists only of a summary of certain publicly available information. Any such information does not purport to be a complete summary of all material information about such Underlying(s) contained in the relevant publicly available information. The Issuer or its affiliates accept no responsibility for accurately reproducing such information contained in publicly available information. Otherwise neither the Issuer nor any of its affiliates accept further or other responsibility or make any representation or warranty (express or implied) in respect of such information.

The Issuer is acting solely as an arm’s length contractual counterparty and neither the Issuer nor any affiliate is acting as a financial advisor or fiduciary of any potential investor in the Complex Products unless it has agreed to do so in writing.

This document may not be reproduced either in whole or in part without the prior written approval of the Issuer.
