This Product is a derivative instrument. It does not qualify as unit of a collective investment scheme pursuant to art. 7 et seqq. of the Swiss Federal Act on Collective Investment Schemes (CISA) and is therefore neither registered nor supervised by the Swiss Financial Market Supervisory Authority FINMA. Investors do not benefit from the specific investor protection provided under the CISA.

This document is not a prospectus within the meaning of article 1156 of the Swiss Code of Obligations (CO) or article 40 et seqq. of the FinSA.

I. Product Description

Product description	The Tracker Certificate replicates the price movements in the Underlying (adjusted by the Unitst, the Management Fee and, as the case may be, the FX Rate) and is therefore in terms of risk comparable to a direct investment in the Underlying. The Underlying is a dynamic, discretionarily managed Index. At the Redemption Date, the Investor will receive a Cash Settlement in the Settlement Currency, as further described under Redemption.
Index description	The Underlying is an actively managed index (the " Index ") which is discretionarily managed by the Index Sponsor and calculated by the Index Calculation Agent. The components of the Underlying (the " Components ") are rebalanced on a regular basis. The Index Sponsor determines and is responsible for the composition of the Underlying and may add, replace or remove Components in accordance with a set of predefined index guidelines set out in the index rule book "Topicks Index", Version ID U3YRY, dated 20.01.2020 (the " Index Rule Book ").
Objective	The investment objective of the Index is to achieve capital appreciation and to outperform the U.S. stock market by regularly changing its Components. The Index invests in stocks listed on a U.S. Stock Exchange and its Components are selected according to the following criteria: listed on a U.S. Stock Exchange with a minimum market capitalization of 500mio, that belong to the consensus long equity picks of highly successful hedge fund managers. The Components are weighted as follows: investment per position will not exceed 10%
Universe	The Index universe consists of eligible components and may include Shares, Funds, Cash Instruments as determined by the Index Sponsor, subject to the restrictions defined in the Index Rule Book.
Restrictions	The Index may not maintain short positions. A maximum of 100 Components is allowed in the Index. More detailed information can be found in the Index Rule Book.
Rebalancing	The Index Sponsor may submit a maximum of 250 rebalancing requests per year.
Distributions	Net distributions with respect to Components (after deduction of any expenses and taxes) will lead to an adjustment of the Index as specified in the Index Rule Book.

The Index represents a hypothetical portfolio. There is no obligation on the Index Calculation Agent or any other party to purchase and/or hold any Components of the Index and there is no actual portfolio of assets to which any person is entitled or in which any person has any ownership interest. The Index is merely comprised of Components, the performance of which will be used as a reference point for the purposes of calculating the value of the Index. The Issuer shall be free to choose how to invest or further proceed with any capital raised by the issuance of any of the Certificates.

References to any rebalancing of the Index or addition, adjustment, substitution, replacement or removal of Components should not be construed as imposing an obligation on the Issuer, the Index Calculation Agent or any person actually to acquire or dispose of any securities, investments, assets or other property but are references to the change in, and relate solely to the calculation of, the value of the Index, which is relevant for the determination of any amount payable in respect of the Certificate.

Upon request, the Index Rule Book and the latest composition of the Index are available free of charge from the Lead Manager (Leonteq Securities AG, Europaallee 39, 8004 Zurich, Switzerland or termsheet@leonteq.com).

The Terms and Conditions of this Product have been adjusted.

The Investor is entitled to receive from the Issuer, subject to an Extraordinary Termination, on the Redemption Date per Product a Cash Settlement in the Settlement Currency corresponding to the value of the Underlying on the Final Fixing Date adjusted by the Units_t, the Management Fee and, as the case may be, the FX Rate. This amount equals Value_t on the Final Fixing Date, where Value_t is calculated according to the following formula and reasonably determined by the Calculation Agent:

$$\text{Value}_t = \text{FX Rate}_t \times \text{Units}_t \times \text{Index Value}_t - \text{AMF}_t$$

Index Value _t	Means the official closing price of the Underlying on Scheduled Trading Day t as published by the Index Calculation Agent, and as reasonable determined by the Calculation Agent.

Where Index Value_{t-1} means Index Value_t of the Underlying on Scheduled Trading Day t, adjusted by any costs incurred by the Issuer or a hedging party thereof for unwinding risk reducing hedging transactions relating to the Issuer's obligations under the Product, as reasonable determined by the Calculation Agent. Units_t are rounded in accordance with the Rounding Convention.

Following the adjustment of Unitst by AMF_t, AMF_t is reset to zero.

AMF _t	Means the accrued management fees on Scheduled Trading Day t and is determined by the Calculation Agent as follows:
------------------	---

$$\text{AMF}_t = \text{AMF}_{t-1} + \text{Value}_{t-1} \times \text{MF} \times \text{DayCount}_t$$

and $\text{AMF}_0 = 0.00$

DayCount _t	Means the actual number of calendar days between (and including) Scheduled Trading Day t-1 to (and excluding) the current Scheduled Trading Day t divided by 360.
-----------------------	---

Initial Fixing Level (Index Value ₀)	Means the official closing price of the Underlying on the Initial Fixing Date as determined by the Calculation Agent.
