If the Underlying never trades at or below the Knock-in Level between the Initial Fixing Date and the Final Fixing Date, the performance of the ZKB Barrier Reverse Convertible will equal the Coupon of 7.10 %, cf. table under "Knock-in Level untouched", paid out during the term of the Structured Product according to the Coupon Payment Date(s). If, however, the Underlying has traded at or below the Knock-in Level between the Initial Fixing Date and the Final Fixing Date, cf. table under "Knock-in Level touched", the loss of the ZKB Barrier Reverse Convertible at maturity corresponds to the loss of the Underlying less the Coupon(s) of 7.10 %, received during the term of the Structured Product. If the Final Fixing Level of the Underlying is at or above the Cap Level, redemption will be 100% of Denomination. Additionally, the Coupon(s) will be paid out according to Coupon Payment Date(s).

The table above is valid at maturity only and is by no means meant as a price indication for this Structured Product throughout its lifetime. The price of this Structured Product depends on additional risk factors between the Initial Fixing Date and the Final Fixing Date. The price quoted on the secondary market can therefore deviate substantially from the above table.

3. Material Risks for Investors

Issuer Risk

Obligations under this Structured Product constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the Structured Product not only depends on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this Structured Product.

Specific Product Risks

Structured Products are complex financial instruments, which entail considerable risks and, accordingly, are only suitable for investors who have the requisite knowledge and experience and understand thoroughly the risks connected with an investment in these Structured Products and are capable of bearing the economic risks. The loss potential of an investment in ZKB Barrier Reverse Convertible is limited to the difference between the purchase price of the ZKB Barrier Reverse Convertible and the Final Fixing Value of the Underlying at maturity multiplied by the Ratio. The guaranteed Coupon reduces the loss of the ZKB Barrier Reverse Convertible compared to a direct investment in the Underlying. The value of the Underlying can then be lower than the Cap Level. This ZKB Barrier Reverse Convertible is denominated in CHF. If the reference currency of the investor differs from CHF, the investor bears the risk of currency fluctuations between the reference currency and the CHF.

4. Additional Terms

Specific modification rules for certain types of Underlyings stated in the base prospectus shall prevail. If the Issuer determines, for whatever reason, that an adequate modification is not possible, the Issuer has the right to redeem the Structured Products early.
