Redemption

The Investor is entitled to receive from the Issuer either a delivery of the Underlying or an amount in the Settlement Currency, according to the following scenarios:

Scenario 1
If an Early Redemption Event has occurred, the product will be early redeemed at 100% of the Nominal in cash on the next Coupon Payment Date following the Early Redemption Event.

Scenario 2
If NO Kick-In Event and NO Early Redemption Event has occurred, the Investor will receive 100% of the Nominal in cash on the Redemption Date.

Scenario 3
If a Kick-In Event has occurred and NO Early Redemption Event has occurred and
1) If the Expiration Value of all Underlyings is at or above the respective Strike Level, the Investor will receive 100% of the Nominal in cash on the Redemption Date.
2) If the Expiration Value of one or more Underlyings is below the respective Strike Level, the Investor will receive the Underlying on the Redemption Date with the worst performance since the Pricing Date, taking into account the relevant Conversion Ratio. The sum of all fractional entitlements to the Underlying, per Nominal, will be paid in cash, based on the Expiration Value. The coupon payment is due in any case.

Kick-In Event
A Kick-In Event shall be deemed to occur if, at any time on any Exchange Business Day during the period from and including the Pricing Date to and including the Expiration Date, the level of any of the Underlyings quoted by the Related Exchange is at or below the respective Kick-In Level, as reasonably determined by the Calculation Agent.

Expiration Value
Official closing value of the Underlying on the Expiration Date on the Related Exchange, as determined by the Calculation Agent.

Early Redemption Event
An Early Redemption Event shall be deemed to occur if, on one of the Observation Dates the closing price of all Underlyings is at or above the Early Redemption Level, as reasonably determined by the Calculation Agent. In this case the product will be early redeemed on the next Coupon Payment Date following the Early Redemption Event.

Product Structure

The Kick-In GOAL worst-of style with Early Redemption is a product that provides a fixed coupon and the redemption is linked to the performance of the worst performing Underlying.

As long as no Kick-In Event or an Early Redemption Event has occurred, the Investor will in any event receive 100% of the Nominal in cash. Otherwise, the Investor will receive:
- 100% of the Nominal in cash, if at Expiry all Underlyings close at or above the respective Strike Level; or

- the worst performing Underlying, taking into account the relevant Conversion Ratio, if at Expiry one or more Underlyings close below the Strike Level.

The Coupon will be paid out in any scenario. The Product offers a relatively high coupon in return for not profiting from gains above the strike level and for taking the risk of a loss potential equivalent to a direct investment in the worst performing Underlying.

In addition to a standard Worst-of Kick-In GOAL, this Worst-of Kick-In GOAL contains an early redemption feature: If the closing prices of all Underlyings are on any Observation Date at or above the Early Redemption Level, this Worst-of Kick-In GOAL will early redeem at 100% of the Nominal in cash.

**Tax Treatment Switzerland**

Swiss Transfer Stamp Duty: The product qualifies as a taxable security (bond). In principle secondary market transactions are subject to Swiss Stamp Duty.
If shares are delivered to the investor at redemption, the delivery of the shares is in principle subject to the Swiss Stamp Duty.
Swiss Income Tax: For Swiss tax purposes this product is qualified as a combination of an option and a bond with the majority of the return consisting of coupon as opposed to discount or
agio (non IUP). For private investors resident in Switzerland the interest component of
the coupon and the increase of the bond floor (if any) are subject to income tax. The tax
liability related to the increase of the bond floor crystallises at redemption and does not
depend on the time of purchase. However, any gain derived from the option is
considered as capital gain and is therefore for such investors not subject to income tax.

Swiss Withholding Tax
This product is not subject to the Swiss Issuer Withholding Tax. It depends on the
jurisdiction of the issuer whether a foreign issuer withholding tax applies.

Additionally, any delivery of underlying might be subject to fees and/or non-Swiss stamp duty.
The tax information only provides a general overview over the Swiss tax consequences linked to this product based on the tax
dependents and the practice of the tax administration at the time of issue. Tax laws and the practice of tax administrations may
change, possibly with retroactive effect.

Classification
This Product does not represent a participation in any of the collective investment schemes pursuant to Art. 7 ff of the Swiss
Federal Act on Collective Investment Schemes (CISA) and thus does not require an authorisation of the Swiss Financial Market
Supervisory Authority (FINMA). Therefore, Investors in this Product are not eligible for the specific investor protection under the
CISA. Moreover, Investors in this Product bear the issuer risk.

Furthermore, this Product does not benefit from any depositor protection under Art. 37a under the Swiss Federal Law on Banks
and Savings Banks (Banking Act) or other forms of deposit insurance under any other law as might be applicable to this
Product.

2. Prospects of Profits and Losses
Market Expectation
Investors in this Product expect all Underlyings to trade sideways. In any case Investors
expect that none of the Underlyings trade below the Kick-In Level.

Effect of the performance of the Underlying on redemption amount or on delivery obligation:
- Positive performance
  If all Underlyings perform positively, Investors realise a positive return.
- Sideways to slightly negative performance
  If all Underlyings perform sideways to slightly negative, Investors still realise a positive
  return.
- Pronounced negative performance
  If one of the Underlyings performs negatively and additionally closes below the Kick-In
  Level, Investors may lose some or all of their investment (irrespective of the
  performance of the other Underlyings).

Maximum Return
The profit potential is limited to the coupon payment(s).

Maximum Loss
Investors may lose some or all of the investment as they are fully exposed to the
performance of the worst performing Underlying.

3. Significant Risks for Investors
General risk warning
Potential Investors should understand the risks associated with an investment in the
Product and shall only reach an investment decision after careful considerations with
their legal, tax, financial and other advisors of (i) the suitability of an investment in the
Product in the light of their own particular financial, fiscal and other circumstances; (ii)
the information set out in this document and (iii) the Underlying(s). The following is a
summary of the most significant risks. Further risks are set out in the Product
Documentation.

Risk Tolerance
Investors in this Product should be experienced Investors and familiar with both
derivative products and the stock markets. Although Investors benefit from a
predefined, regular coupon payment, they must be willing to make an investment that
is exposed to the full down-side risk of the worst performing Underlying.
A high coupon can indicate a higher risk, in that the rate of the coupon relative to the
rate of the risk-free return indicates the overall risk of the product.
Multiple Underlyings (with worst-of feature) allow for a higher return, but at the same
time increase the overall risk to Investors.

Product specific risks
Loss Potential
Investors may lose some or all of the investment as they are fully exposed to the
performance of the worst performing Underlying.
