<b>Key Elements of the Product</b>	<p>This product is a combined investment instrument that consists of a fixed income security and the sale of a "out-of-the-money" put option. This allows the investor to benefit from the current volatility of the Underlyings. The product regularly pays out attractive Coupons during the term. An above-average return is achieved when prices fall slightly, stagnate or rise slightly. If the Final Fixing Value of all Underlyings is at or above the Cap Level, the investor receives a cash redemption in the amount of the Denomination. If the Final Fixing Value of at least one Underlying is below the Cap Level, the investor will receive a physical delivery of a number of Underlyings as defined under "Redemption method" of the Underlying with the worst performance between Initial Fixing Date and Final Fixing Date.</p>		
<b>Taxes</b>	<p>The product is considered as transparent and has predominant one-off interest (IUP). The Coupon of 4.40% is divided into a premium payment of 4.40% and an interest payment of 0.00%. The option premium part qualifies as capital gain and is not subject to Swiss income tax for private investors with Swiss tax domicile. The implied internal rate of return is subject to income tax for private investors with Swiss tax domicile at the time of sale or at maturity (IRR 0.00% p.a., present value of bond part at issue 100.00%) and is determined in compliance with the 'modifizierte Differenzbesteuerung' tax rule based on the ESTV Bondfloor Pricing method. The Swiss withholding tax is not levied. In the case of physical delivery of the Underlying at maturity, the federal securities transfer stamp is levied on the basis of the Cap level. The Federal securities transfer stamp tax is not levied on secondary market transactions. The product may be subject to further withholding taxes or duties, in particular under the rules of FATCA or Sect. 871(m) U.S. Tax Code or foreign financial transaction taxes. ## 2. Profit and Loss Expectations at Maturity

### Profit and Loss Expectations at Maturity

Worst Underlying		Redemption		
Price	Percent	Product	Coupon	Performance in %
CHF 48.52	-30.00%	CHF 875.00	CHF 44.00	-8.10%
CHF 55.46	-20.00%	CHF 1'000.00	CHF 44.00	4.40%
CHF 62.39	-10.00%	CHF 1'000.00	CHF 44.00	4.40%
CHF 69.32	0.00%	CHF 1'000.00	CHF 44.00	4.40%
CHF 76.25	10.00%	CHF 1'000.00	CHF 44.00	4.40%
CHF 83.18	20.00%	CHF 1'000.00	CHF 44.00	4.40%
CHF 90.12	30.00%	CHF 1'000.00	CHF 44.00	4.40%

If the Final Fixing Value of all Underlyings is at or above the Cap Level, the performance of the product is always given by the Coupons paid out during the term (acc. "Coupon Dates"), in this case 4.40%. However, if the Final Fixing Value of at least one Underlying is below the Cap Level, the investor will receive a physical delivery of a number of Underlyings as defined in Ratio. The acquisition price of the delivered Underlyings is 80.00% of the Initial Fixing Value, which means that the performance of the Product is less negative than the performance of the Underlying. This negative performance is reduced by the guaranteed Coupons paid out during the term.

The table above is valid at maturity only and is by no means meant as a price indication for the present Product throughout its lifetime. Additional risk factors may have a significant impact on the value of the Product during the term. The price quoted on the secondary market can therefore deviate substantially from the above table. For this table it was assumed, that Alcon AG rs was the worst performing Underlying. This selection is just a representative example of the possible alternatives. Currency risks between the Underlying and the Product are not considered in the table.

### 3. Material Risks for Investors

#### Issuer Risk

Obligations under these Structured Products constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the Structured Product not only depends on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this Structured Product.

#### Specific Product Risks

Structured Products are complex financial instruments, which entail considerable risks and, accordingly, are only suitable for investors who have the requisite knowledge and experience and understand thoroughly the risks connected with an investment in these Structured Products and are capable of bearing the economic risks. The loss potential of an investment in ZKB Reverse Convertibles on worst of in the case of a title delivery is limited to the difference between the purchase price of the product and the cumulative value of the number of Underlyings as defined in 'Redemption Method'. The Coupon, which is paid out in any case, reduces the loss of the product compared to a direct investment in the worst performing Underlying. The price of the Underlyings may be significantly below the Cap Level at redemption.

The Product is denominated in CHF. If the investor's reference currency differs from the CHF, the investor bears the risk between the CHF and his reference currency.

### 4. Additional Terms

Specific modification rules for certain types of Underlyings stated in the Base Prospectus shall prevail. If the Issuer determines, for whatever reason, that an adequate modification is not possible, the Issuer has the right to redeem the Products early.

#### Market Disruptions

Compare specific provisions in the Base Prospectus.

#### Change of Obligor

The Issuer is entitled at all times and without the consent of the investors to assign in whole (but not in part) the rights and claims under individual Structured Products or all of them to a Swiss or foreign subsidiary, branch or holding company of the Zürcher Kantonalbank (the "New Issuer") to the extent that (i) the New Issuer assumes all of the obligations arising out of the assigned Structured Products which the previous Issuer owed in respect of these Structured Products, (ii) the Zürcher Kantonalbank enters into a Keep-Well Agreement with the New Issuer with terms equivalent to the one between the Zürcher Kantonalbank and Zürcher Kantonalbank Finance (Guernsey) Limited, (iii) the New Issuer has received from the supervisory authorities of the country in which it is domiciled all necessary approvals for the issue of Structured Products and the assumption of the obligations under the assigned Structured Products.
